Størrelse	985 × 725 × 1324 mm
Vægt	207,000 kg
Kapasitet	exponeringsyta 1,46m <sup>2</sup>
Teknisk informasjon	230 V, 0,569 kW, 1NPE, 50 Hz
Kjølemedie	R1234YF

### Beskrivelse

Stylish Metos Cube II 1000 glass display for full-service has a trendy design and helps the products to look attractive on every shelf, providing a fine framework for the sales.

The sales area of this spacious glass display is 1.46 m<sup>2</sup>. This glass display has three tempered glass shelves equipped with a cooling fan for even cool air circulation. The top structure of the glass display is made of tempered double glass which keeps the inside of the display cool and prevents it from misting. The sliding doors with ball bearings on the seller's side are easy to open. The front glass is hinged, which makes it easy to keep the glass display clean.

The LED-light at the top part of the Metos Cube II 1000 full-service display and the glass shelves provide a clear and almost unobstructed view on the display with its visible black frame adding the sense of integrity. The bottom plate and the bottom panel of the display are grey

(RAL 9006), available also in other RAL-colours at a separate price. The explicit design of this glass display allows it to be placed in a coffee house, bakery, transport station or a hotel lobby.

The glass display, equipped with an electronic control unit, has an automatic defrosting and evaporation of the meltwater.

The temperature range is +4...+8°C (ambient temperature +25°C and relative humidity 60%). A handy pull-out machinery for quicker maintenance.

- 3 tempered glass shelves
  - sales area 1.46 m<sup>2</sup>
  - LED-light at the top of the glass display
  - sliding doors with ball bearing on the seller's side
